# What's Driving Rates? And Where?

- Payrolls in March surged with improvement in most industries – up 916,000 jobs and a lower rate (6%).
- The increase in payrolls is directly tied to vaccinations and a relaxing of regulations.
- Businesses are reopening and gaining momentum with eased restrictions. ISM Services index rose to its highest read since 1997. That means producers are optimistic of an ongoing recovery.
- A stimulus fueled consumer is out to spend those checks.
- Business are encouraged to hire as long as the view improves.
- Housing continues to boom although slowing slightly as inventories decrease.
- The economy is growing at its fastest pace since 1984, which led the IMF to predict it will surpass its pre-pandemic size. Thanks in large part to the \$1.9 trillion virus stimulus package.
- The warning remains the same from the Fed who says we are far from complete but they continue to provide extraordinary market support.
- The Fed is supporting the economy through continued buying of securities.
- This drives stock investors into new historic nose bleed heights – the S&P hits 4,000 for the first time.
- This does cause risks - more for stocks than bonds – as regulators target hedge funds (Archegos) and private funds.

# Big, Bold and Expensive

The new administration is ready to launch its new package to “Build Back Better.” The estimated \$2 trillion plan will start with jobs and tackle infrastructure, climate and emissions. A package this size – from homes to high speed rail - could lift productivity and GDP with 69% spent in the first year. But it could squeeze out private and state/local investments also.

At least some in Congress have to be questioning whether this size of an additional stimulus is needed at this point right after passing \$2T, the impact of which has yet to be felt.

Additionally, some do question the sheer size with debt already at alarming levels. With the combined Trump/Biden \$5.7T in stimulus spending, the US debt to GDP ratio is already over 100%. With intra-governmental debt that rises it to 128%.

Sometimes more is just more.

The Fed is remaining on hold despite their optimistic outlook which includes a 6.5% growth rate in 2021, a 2.4% inflation rate, and a decline in the unemployment rate to 4.5%. Chair Powell has indicated that future adjustments will be made on *realized* improvements *not anticipation* of that improvement. Not all Fed Presidents agree. Dallas Fed President Kaplan has forecast a rate hike next year in order to wean off the Fed’s extraordinary efforts in supporting the economy and the markets.

Meanwhile, of course, geopolitics continue apace. China has been flexing its muscles in military *exercises* surrounding Taiwan. Some of that bravado could come from their hesitancy to add to debt to fight the pandemic. They really want to be the world’s reserve currency.

The major moves in the stock market have helped to entice investors out of bonds rising longer rates, but risk can be dangerous as we saw with the Robinhood debacle and the Achegos *hedge fund implosion*.

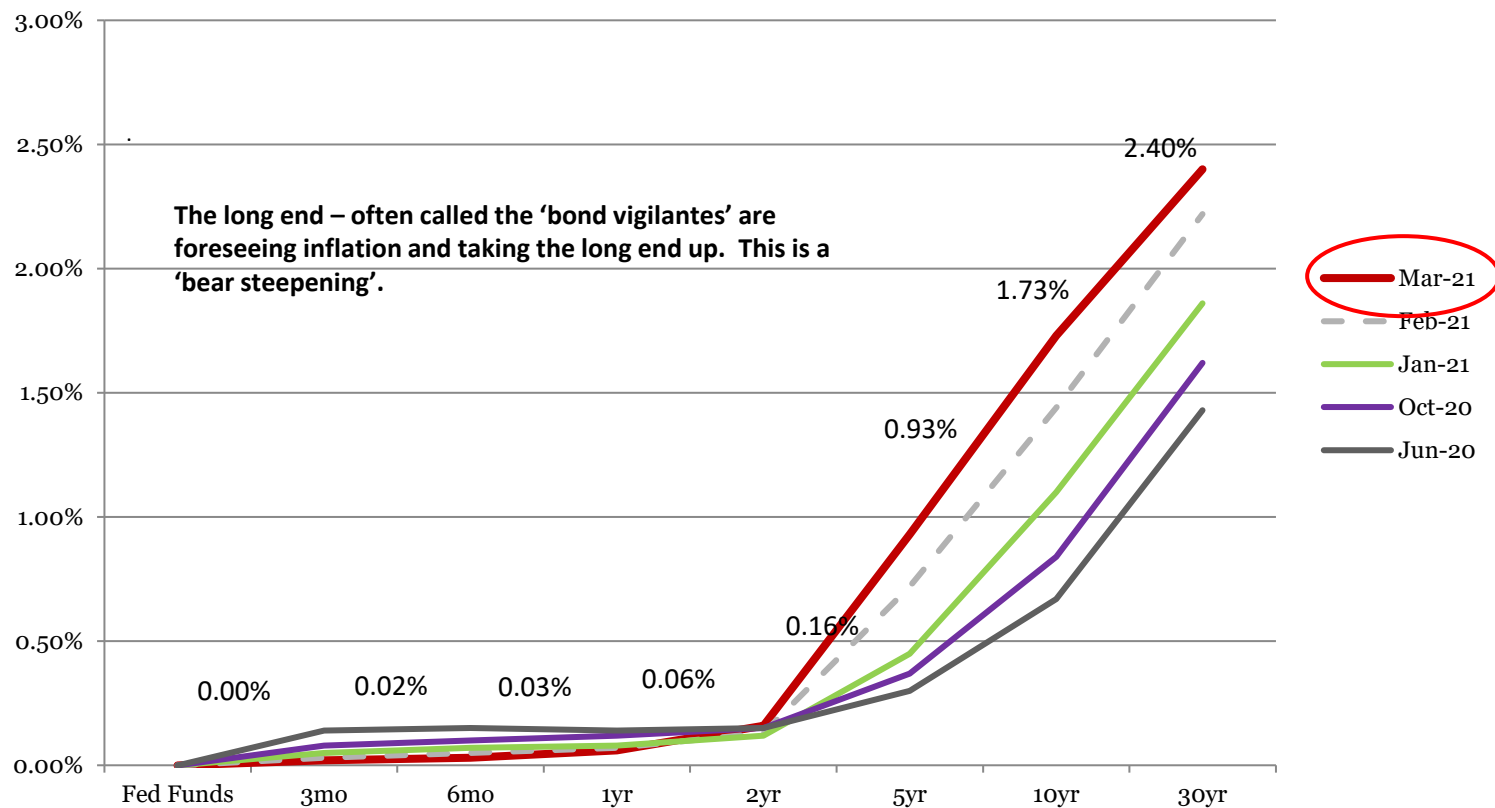

Makes you glad you are in the bond market even with low rates!

The Fed remains on hold...

# A Different Look

- The curve is reacting to an improving economy and feeding off the stimulus trough that promises even more funds thrown into the economy.
- The bond market is foreseeing inflation.
- The market will fight the Fed and their asset purchases on the long end. Usually the market wins. The rates are going up.
- The various Covid vaccines have been a major boost to confidence. A more robust economic recovery may require several more months.
- The Fed has stated its intention to stay at 0.0% Fed Funds through 2023. Looks like the curve will do its job for it.

End of Month Rates - Full Yield Curve – Fed Funds to 30yr

San Antonio River Authority

---

Linda Patterson, President  
*Patterson & Associates*

---

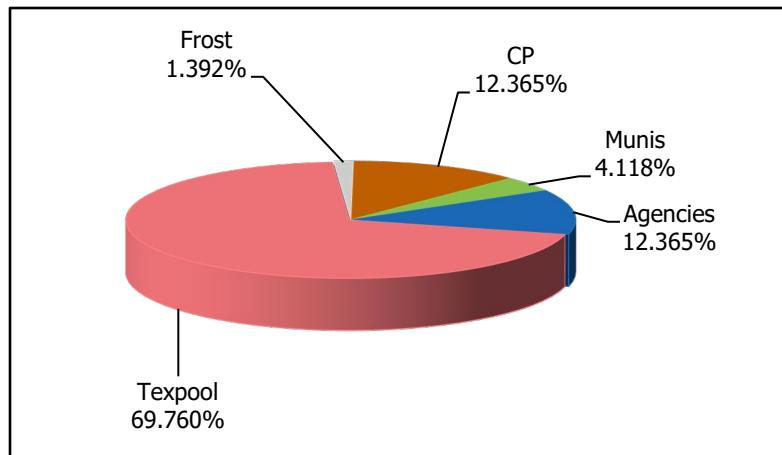

<sup>1</sup> WAM, represents weighted average maturity.

<sup>2</sup> *Change in Market Value* is required data, but will primarily reflect the receipt and expenditure of the Authority's funds from quarter to quarter.

# Your Portfolio

As of March 31, 2021

- P&A constantly reviews your portfolio for optimal asset allocation and a controlled average maturity because a diversified portfolio can better adjust to volatile market conditions. These are unusual times and where extensions can be made it is important to make them to find any available safe value in the markets.
- The graphs below show asset allocations by market sector and by maturity in your portfolio. Liquidity has been reduced to little or no value but with a flat short curve it may be the only sector available out to twelve months without the use of CP. Our expectation is of continuing dismally low rates but we look for value in your authorized sectors to capture the yield available as markets change.
- The non-cash portion of your portfolio is yielding 0.35%.
